

Categorical Exclusion Documentation Format for Actions Other Than Hazardous Fuels and Fire Rehabilitation Actions

AZ10N6W23001 AML Backfill DOI-BLM-AZ-P010-2011-022-CX

A. Background

BLM Office: Hassayampa Field Office

Lease/Serial/Case File No.: N/A

Proposed Action Title/Type: AZ10N6W23001 AML Backfill

Location of Proposed Action: T. 10 N., R. 6 W., NW $\frac{1}{4}$ SW $\frac{1}{4}$ of section 23, G&SRM, Yavapai County, Arizona.

Description of Proposed Action: BLM would backfill a vertical +200 ft. deep open vertical abandoned mine shaft (AZ10N6W23001) located on public land, adjacent to a residential area on private land. The easily accessible shaft is located about 10 ft. from the edge of Ghost Town Road north of Congress, AZ. Site surveyed and cleared for cultural resources by BLM Archaeologist Chris McLaughlin in September 2010. Site cleared for wildlife by Dr. Joel Diamond of Arizona Game & Fish Dept. on October 22, 2010, who recommends that a wildlife exclusion (chicken wire) be installed over the shaft collar 4 to 7 days before backfilling the shaft. BLM would then use a dozer to push material from the waste rock dumps next to the shaft, and/or native rock and soil, as needed, into the hole. Backfilling the shaft would significantly improve public safety, as the physical safety hazard would be permanently eliminated. The site is located at:

<u>AMSCM identifier</u>	<u>Latitude</u>	<u>Longitude</u>	<u>UTM coordinates (NAD 83)</u>

B. Land Use Plan Conformance

Land Use Plan (LUP) Name: Bradshaw-Harquahala Record of Decision and Approved Resource Management Plan.

Date Approved/Amended: April 2010

The proposed action is in conformance with the applicable LUP because it is specifically provided for in the following LUP decision(s): N/A

The proposed action is in conformance with the LUP, even though it is not specifically provided for, because it is clearly consistent with the following LUP decision(s) (objectives, terms, and conditions):

The Bradshaw-Harquahala Record of Decision and Approved Resource Management Plan, approved April 2010, states on page A-24, in Public Safety – Standard Operating

Procedures – Abandoned Mine Lands: “Inspect abandoned mine land sites to identify all physical hazards presenting a safety risk to the public, and take appropriate action to mitigate any hazards and prevent public access to abandoned mine land contaminated areas.”

C: Compliance with NEPA:

The Proposed Action is categorically excluded from further documentation under the National Environmental Policy Act (NEPA) in accordance with 516 DM 11.9, Appendix 4, J (8) – Installation of minor devices to protect human life, (e.g., grates across mines), and, Appendix 4, J (10) -- Removal of structures and materials of no historical value, such as abandoned automobiles, fences, and buildings, including those built in trespass and reclamation of the site when little or no surface disturbance is involved.

This categorical exclusion is appropriate in this situation because there are no extraordinary circumstances potentially having effects that may significantly affect the environment. The proposed action has been reviewed, and none of the extraordinary circumstances described in 516 DM2 apply.

I considered the following when reviewing the proposed project:

- The act of backfilling the open mine shaft will have a positive effect on public health & safety, particularly given that the site is located adjacent to a well-traveled road in a residential area near Congress, AZ.
- The sole active mining claimant onsite was notified of BLM’s desire to reclaim the site in a certified letter dated 10/27/10. Signed return receipt for that letter is in case file, but no further contact was received from claimant.
- A cultural clearance has been completed for the site. No historic features would be impacted by the proposed backfilling. Standard stipulations apply, along with the following special stipulation: “During backfilling work, the contractor will carefully avoid all historic features and structures. An archaeologist will be onsite when work is done and will monitor to ensure that the work is carried out away from all historic artifact scatter materials.”
- No T&E habitat or species are present in this area, and there is no significant wildlife habitat in the shaft to be backfilled. A wildlife exclusion would be installed on the shaft by BLM between 4 and 7 days before it is backfilled, to ensure that no bats, owls, or other wildlife remain in the shaft when it is backfilled.

Name: Steven Cohn

Title: Field Manager, Hassayampa Field Office

Contact Person

For additional information concerning this CX review, contact Mining Engineer Matt Plis, Phoenix District Office, 21605 N. 7th Avenue, Phoenix, Arizona 85027, 623-580-5500

Note: A separate decision document must be prepared for the action covered by the CX.

Approval and Decision

Compliance and assignment of responsibility: Matt Plis, Environmental Engineer

Monitoring and assignment of responsibility: Roy Draper, Surface Protection Specialist

Review: We have determined that the proposal is in accordance with the categorical exclusion criteria and that it would not involve any significant environmental effects. Therefore, it is categorically excluded from further environmental review.

Project Description: BLM would backfill a vertical +200 ft. deep open vertical abandoned mine shaft (AZ10N6W23001) located on public land, adjacent to a residential area on private land. The easily accessible shaft is located about 10 ft. from the edge of Ghost Town Road north of Congress, AZ. Site surveyed and cleared for cultural resources by BLM Archaeologist Chris McLaughlin in September 2010. Site cleared for wildlife by Dr. Joel Diamond of Arizona Game & Fish Dept. on October 22, 2010, who recommends that a wildlife exclusion (chicken wire) be installed over the shaft collar 4 to 7 days before backfilling the shaft. BLM would then use a dozer to push material from the waste rock dumps next to the shaft, and/or native rock and soil, as needed, into the hole. Backfilling the shaft would significantly improve public safety, as the physical safety hazard would be permanently eliminated.

Decision: Based on a review of the project described above and field office staff recommendations, I have determined that the project is in conformance with the land use plan and is categorically excluded from further environmental analysis. It is my decision to approve the action as proposed, with the following stipulation: During backfilling work, the contractor will carefully avoid all historic features and structures. An archaeologist shall ensure that the work is carried out away from all historic features.
